

## 1. How can I create a Market on Unifty?

Click on the “Market Builder” button on the left toolbar. After that, you’ll see an option - “Add new Market”. Once you pick that option, a pop-up form will appear, where you will enter all data that is required.

The screenshot shows the 'New Market' form on the Unifty.io platform. The form is titled 'New Market' and includes the following fields and sections:

- Name \***: Enter a name for your market.
- Select Tier \***: Tier 1
- Description**: A text area for describing the market.
- Click to Choose image...**: A button to select an image for the market.
- Fee Address \***: 0x87022998d42083340083d086967403183185
- Sales fee in percent \***: 2.00
- Swap Fee in percent (NIF) \***: 2.00
- SOCIAL (OPTIONAL)**: Fields for Twitter, Discord, Telegram, Medium, Instagram, and Youtube links.
- Website**: Field for website URL.
- Email address**: Field for email address.
- Phone**: Field for phone number.
- Custom Link**: Field for a link to a custom URL.
- Custom Link Test**: Field for a link text for a custom URL.

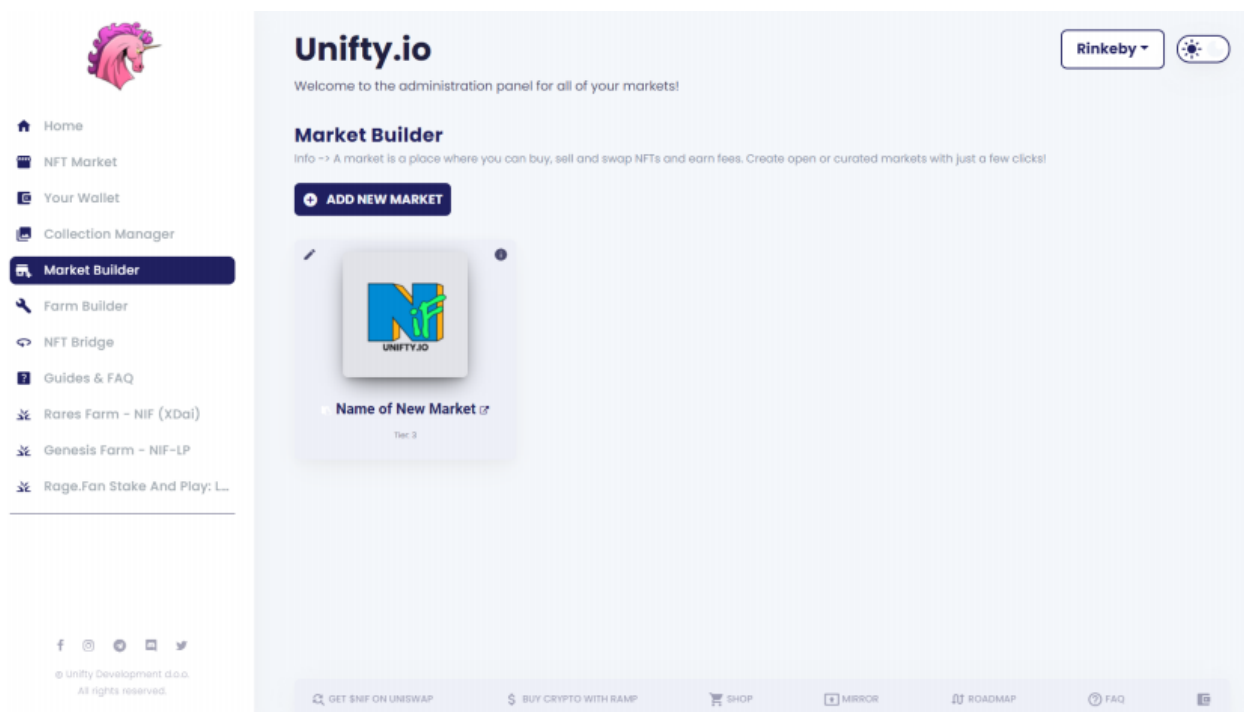

At the bottom of the form, there is a 'CREATE MARKET' button and a 'cancel' button. A large 'W' watermark is overlaid on the image.

- ❖ Name - Give your market a name (be creative).
- ❖ Tier - Choose 1 of 3 available tier levels and stake \$NIF to create your market. All tiers include full functionality plus bonus features: Tier1 (10NIF) - allow/disallow collections, Tier2 (25NIF) - Tier 1 + allow/disallow individual NFTs, Tier3 (100NIF) - Tier 1 + Tier 2 + allow/disallow wallet addresses. Additionally, Tier3 allows you to keep all sale and swap fees, while Tier1 and Tier2 allow keeping 50% of fees. You may unstake at any time. Unstaking will allow to sell off existing offers on the market but no new offers can be placed.
- ❖ Description - Something that describes your market, but it's not required.
- ❖ Image - Choose an image of your market. Also, not required.
- ❖ Fee Address - your address should appear here.
- ❖ Sales fee in percent - set sales fee in percent (NIF)
- ❖ Swap fee in percent - set swap fee in percent (NIF)

Everything else is optional but allows users to find out more about your project.

If you're satisfied with your market data - hit the “create” button. Verify the details in the MetaMask dialogue. First, you need to allow/approve so click confirm and wait for the transaction to finish. After that click the “create market” button, and again wait for the transaction

to finish. When confirmed, you can close the Market Builder form, and see that your brand new market has been created.

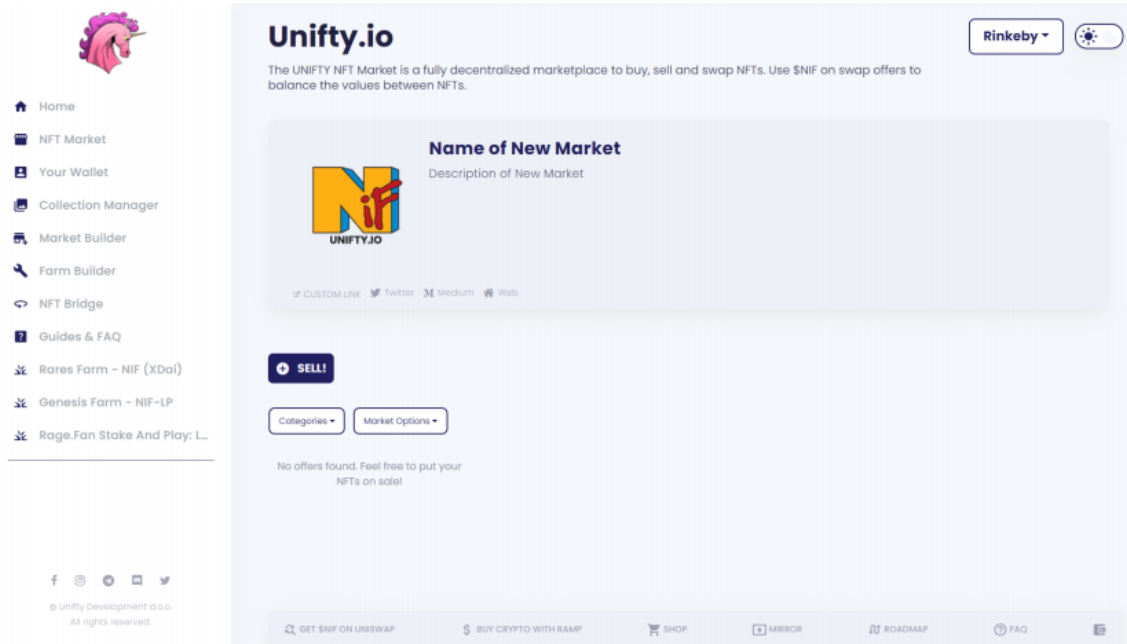

## 2. What are the options on the Market?

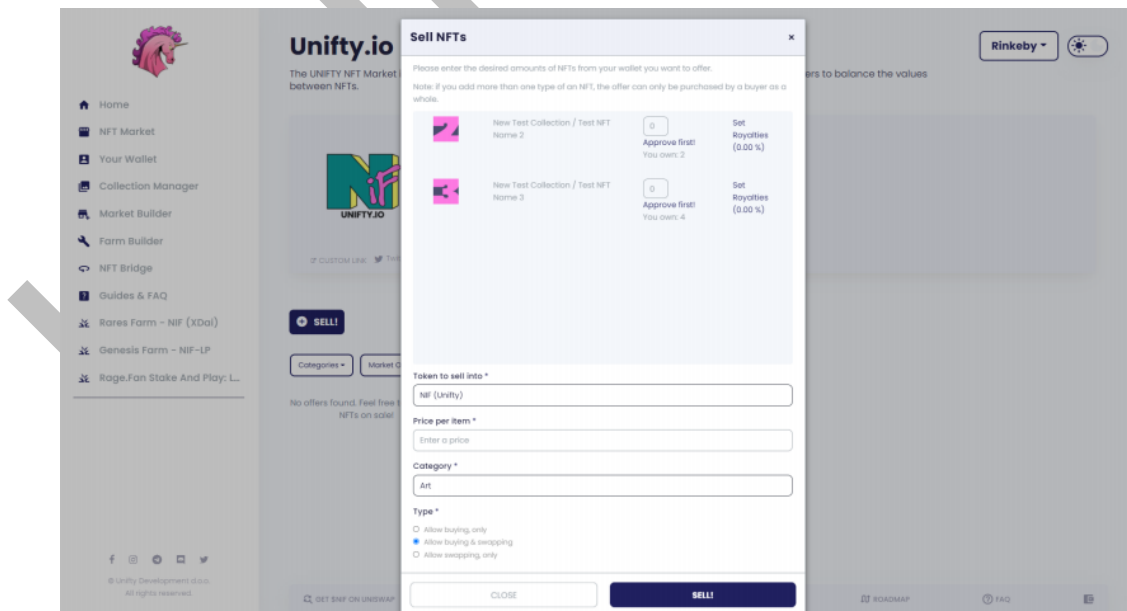

- ❖ Withdraw Fees - you can lookup and withdraw collected fees.
- ❖ Withdraw Swap Fees - you can withdraw collected swap fees in \$NIF.
- ❖ Edit Market Info - you can change your market name, description of the market, and your market image. Also, you can add your social account info.
- ❖ Whitelist Wallet
- ❖ Whitelist NFT
- ❖ Whitelist Collection
- ❖ Blacklist Wallet
- ❖ Blacklist NFT
- ❖ Blacklist Collection
- ❖ Unstake - unstaking will disable new offers. Users can still sell their new NFTs, and you can still withdraw fees. You can pick a new tier at any time and resume all features.

### 3. How can I sell NFTs on the Market?

When you enter your market, you will be offered to sell NFTs. You should be able to see an option - "Sell!"

After selecting the mentioned option, a pop-up form will appear, where you will enter all required data.

- ❖ Now enter the desired amount of NFTs from your wallet that you want to offer. If you add more than one type of NFT, the offer can only be purchased by a buyer as a whole.

## Set Royalties x

If you intend to use royalties, please add them below in percent. 50% max. royalties allowed, only for purchases on the Unify Market.

Royalties in percent \*

0.00

---

CLOSE
SET ROYALTIES

- ❖ If you intend to use royalties, please add them in percent. 50% max royalties allowed, only for purchases on the Unify Market.
- ❖ Next, select a token to sell into. NIF will appear by default, but you can pick to enter any custom ERC20 or LP Token address. You need to know the contract address for the token, which you can find on a block explorer like Etherscan.
- ❖ Enter the price per item.
- ❖ Select the category you want.
- ❖ Select the type of sale - buying only, buying and swapping, or swapping only.

Click Sell, and that's it!

The screenshot shows the Unify.io website interface. On the left is a navigation menu with items like Home, NFT Market, Your Wallet, Collection Manager, Market Builder, Farm Builder, NFT Bridge, Guides & FAQ, Rares Farm - NIF (XDAO), Genesis Farm - NIF-LP, and Rares Fan Stake And Play: L. The main content area is titled 'Unify.io' and 'Name of New Market'. It features a 'SELL!' button, a 'Categories' dropdown, and a 'Market Options' dropdown. Below these is a preview of an NFT titled 'Test NFT Name 3' with a 'BUY' button, an 'OR' separator, and a 'SWAP' button. The footer contains social media icons and a copyright notice: '© Unify Development 2022. All rights reserved.'
